About This Software

The next generation of EVGA Precision has arrived with EVGA Precision XOC. This software allows you to fine tune your NVIDIA graphics card, maximizing cooling and performance. This new version of Precision is built for the latest NVIDIA graphics cards and combines the best of EVGA Precision and EVGA OC Scanner to give you never before seen overclocking features and built in automatic tuning.

Key Features

- Full support for NVIDIA GeForce GTX graphics cards
- Dynamically set independent voltage/frequency points for ultimate control
- Linear mode gives you one click overclocking

-
- Use the Scan mode to find the optimal voltage/frequency curve for your card!
 - Full support for Microsoft DirectX 12 (EVGA card required)
 - OSD interface with RGB color support
 - GPU, Memory and Voltage Control
 - Custom Fan Control/Fan Curve
 - Profiling system allowing up to 10 profiles with hotkey
 - In game screenshot hotkey supports BMP and JPG
 - Much more!

Note: This application has many features and achievements that may void your graphics card's manufacturer warranty. Please consult with your video card manufacturer before using this application. If the card is an EVGA graphics card, overclocking is covered under the warranty term.

Title: EVGA Precision XOC

Genre: Utilities

Developer:

EVGA

Publisher:

English,Japanese,French,Dutch,Korean,Polish,Russian,Traditional Chinese

The image displays the EVGA BIOS interface, specifically the fan control settings. The background features a large circular gauge with a needle pointing to approximately 1750 RPM. A central settings window is open, showing the 'Fan' tab with the following options:

- Enable Automatic Fan Control:
- Fan Speed Update Period: 5000 ms
- Temperature Hysteresis: 0 °C
- Select Preset: Custom

An 'OK' button is visible below these settings. To the right, a 'FAN CURVE' window shows a graph of Fan speed (%) versus Temperature (°C). The graph shows a curve that starts at 40% fan speed at 30°C and rises to 100% fan speed at 90°C.

Temperature (°C)	Fan speed (%)
30	40
50	50
80	80
90	100

At the bottom of the interface, there are buttons for 'K', 'DEFAULT', 'APPLY', 'CURVE', and 'AUTO'. A 'PROFILES' section at the bottom left shows buttons for profiles 1 through 0, along with a version number '6.0.6' and a settings icon.
